## **PORTSEA GOLF CLUB, VIC**

---

Length 5971 meters

Par 72

Architects: Jock Young, Sloan Morpeth & Michael Clayton

Portsea Golf Club is a wonderful Mornington Peninsula course located adjacent to the Point Nepean National Park about 85 minutes south of Melbourne. The purely sand based fairways on the course provide a basis for a great wet weather course and Portsea is one of the best draining courses in Australia.

Recent design improvements in bunkering, teeing grounds and greens have further enhanced the course. The natural draining qualities of soils found in the Portsea area also ensures that golfers enjoy a firm footing all year round.

The course has been carved through natural tea tree scrub which has resulted in a variety of holes from long, sweeping par 5's which wind their ways through deep valleys through to tight par 3 holes which require pinpoint accuracy to ensure the ball remains on the putting surface.
